TD I-110
Built for life

TD I-110 is a durable touch screen speech generating device for those with conditions such as autism. This communication solution is now designed to keep up with even more of life’s adventures.

**Durable**
Take it anywhere thanks to a Gorilla Glass touch screen and built-in crash case.

**Fast**
Enjoy enhanced processing speed, memory and storage.

**10-hour battery**
Use your device for up to 10 hours of continuous run time.

**Powerful speakers**
Project your voice clearly with strong built-in speakers.
Built for communication

This rugged, purpose-built AAC device comes loaded with TD Snap, our symbol-supported software that simplifies and enriches communication. With extra-loud outward-facing speakers, the option of a handle or wheelchair mount plate, and a wide selection of keyguards, your voice will always be heard on your own terms.

TD Snap
A symbol-supported AAC software offering a choice of solutions, complete with tools and resources.

Accessories
TD I-110 comes with several accessories included in the box, which are also available to buy separately as spares or replacements.

Durable Case  Charger  Shoulder Strap  Travel Bag  Quick Release Adapter Plate  Mount Plate with Handle
