TD Snap - Communicate Your Way
TD Snap is a flexible software offering professionals and families a choice of AAC solutions. It comes with a set of powerful tools and resources to empower people with speech and language disabilities to communicate.

- Offers a suite of eye gaze, touch and switch-enabled page sets to meet different communication needs and preferences.
- Page sets come with a powerful set of tools to help simplify editing and enrich communication.
- Each page set also has a unique set of complementary resources to help communicators, caregivers and professionals succeed with communication.

Communicator 5 - More Efficient Communication for All
Communicator 5 converts text and symbols into clear speech and is an excellent solution for adults with intact language and who wish to maintain their independence, like those with ALS. It is also versatile enough for younger users. Packed with features to make communication more efficient, Communicator 5 is easy to navigate and use.

- The Quick Menu allows for swift access to the most commonly used settings, operations, and functions.
- Dwell-free typing lets individuals who use eye gaze communicate much more efficiently than ever before.
- Includes all symbol pages from the Sono Suite.
